

BURN POT FOR FURNACE

Abstract of the Disclosure

5 A method of combusting a fuel in a burn pot includes forming an ash column
within the burn pot, and removing a portion of the ash column. The burn pot
includes a first sidewall portion, a second sidewall portion, and a translatable plate
interposed between the first sidewall portion and the second sidewall portion. The
translatable plate is capable of at least two positions. The translatable plate has an
10 opening therein corresponding substantially to a cross sectional area of an inside
area of the first sidewall portion or the second sidewall portion.
